SUMMARY

Results-driven Software Developer with **2.5 years of experience** in C#, .NET Framework, and Windows Forms Application Development. Proven track record in building large-scale, product-based solutions, including a **Diamond Inventory Management System** with 200+ forms, as well as textile and accounting software applications. Proficient in backend development using **.NET and SQL Server**, and experienced in designing and consuming **REST APIs using Node.js**. Familiar with React.js for front-end development, with a growing focus on modern web application design. Adept at requirement analysis, database design, API integration, and full software development lifecycle (SDLC).

TECHNICAL SKILLS

- **Programming Languages:** C#, HTML, CSS, Bootstrap, JavaScript
- **Frameworks & Libraries:** .NET Framework, React.js, Node.js
- **Databases:** SQL Server
- **Tools & Platforms:** Visual Studio, Git, Postman
- **Other:** REST API Development, Windows Forms, SDLC

PROFESSIONAL EXPERIENCE

Live

Company Name – Silver Technologies, Uttran, Mota Varachha, Surat.

Software Developer – July 2022 – Present

- Developed and deployed product-based Windows applications (Diamond Inventory, Textile, and Accounting software) in live client environments using C# .NET Framework and SQL Server.
- Built REST APIs using Node.js and .NET for backend services, integrated with SQL databases.
- Worked on requirement gathering, database design, and performance optimization for production systems.

PROJECTS

Live

Diamond Inventory Management System

- Large-scale product-based solution for diamond stock tracking, order management, and reporting.
- Built using C#, .NET Framework, SQL Server; included 200+ Windows Forms.

Textile Management Software

- Automated process for textile inventory and billing.
- Developed in C# .NET with SQL Server backend.
